

ANCHORLOG

Compliance Evidence Bundle

This Compliance Evidence Bundle is a point in time export of the work health and safety records held for Sample Site — Demo Street under Example Builder Pty Ltd for the period 1 Jun 2026 to 30 Jun 2026. It was generated by Demo Administrator · Owner on 1 Jul 2026 for provision to a regulator, insurer, or legal adviser. Each record in this bundle carries a SHA-256 content digest of its exported fields, so the recipient can confirm the data shown here matches the accompanying data file.

Site	Sample Site — Demo Street
Builder	Example Builder Pty Ltd
Export type	Date range

7 years after last active status

Site attendance

7 years after site closure

Worker credentials

3 months after expiry unless linked to active induction

Contractor compliance

7 years after statement period end / certificate expiry (floor: recording date)

ANCHORLOG

Evidence Records

For records held while a worker or site remains active, no individual deletion date is shown: the period runs from the worker shell event (last active status or site closure) and from incident linkage. A per record deletion date appears only where an incident has locked that record under the retention cascade.

Other record categories included in this bundle are retained within the site evidentiary records set; a specific period for those categories is being finalised.

Workplace surveillance

Notice method: Signage and induction

Notice given: 1 May 2026

Effective from: 8 May 2026

Builder: Example Builder Pty Ltd

Record integrity

Each record in this bundle carries a SHA-256 digest computed over that record's fields as they appear in this export. To verify, recompute the SHA-256 digest of the matching record in the accompanying audit-pack-data.json file (supplied together in the audit pack .zip) and confirm it equals the value shown. The digest confirms the exported data matches the data file supplied with this bundle. It is computed over this exported snapshot and does not by itself establish the state of the original source record.
